

Edges, Faces, Vertices.

For this activity, first click on the link which will take you to a video explaining all about edges, faces and vertices. You will be able to refer back to this which will help you with the activity.

Remember to also use the information sheet from Monday.

Activity 1.

You need to write down how many edges, faces and vertices each shape has.

For example;

1a) Cube, \_\_\_ edges, \_\_\_ faces and \_\_\_ vertices.

Continue this layout for each shape, this will help to keep your work set out neatly.

Look at the question underneath the shapes, can you spot any mistakes in the table? If so, what are the mistakes and what is the correct answer for the mistake.
