

Polygons and Quadrilaterals.

For today's activity you need to write the correct name of each polygon or quadrilateral.

First try to copy the shape into your book, if the shape has parallel sides, make sure they are parallel and are the same distance apart.

Next, write the name of the polygon or quadrilateral underneath the shape. Can you remember what a polygon is? If you can't remember, look back at the information sheet from Monday, it is there to help you.
