

Can you create a poster to show animals and their babies?
Be as creative as you like. You may want to use Purple Mash to draw the different animals.

Can you name the different stages of a human's life?
You could draw a picture like the one in the middle and label the different stages. Here are a few to start you off.

1. Baby
2. Toddler

Can you describe what happens at each stage?

E.g.

A baby is born and drinks milk from its mother or a bottle.

Their only way of communicating is by crying.

Homework Menu

Our new science topic this term is 'Growth and Survival.' In this topic, you will be learning about how humans and other animals are born, grow and change. You will also be looking at the things we need to stay healthy and survive.

Growth and Survival

Complete a food diary for the week.

Include the things that you eat for your breakfast, lunch and tea. You can also include any snacks you may have in-between.

Remember to try and be as healthy as you can.

Create a healthy meal.

Draw a large circle in your learning journals (maybe draw around a plate) and draw a healthy meal. Remember the meal needs to be balanced.

It needs to include some vegetables, some protein (meat, fish, eggs) and some carbohydrates (bread, pasta, rice, potatoes.)

Rebecca really wants to get a pet rabbit but she does not know how to take care of one. Can you help her?

What should she feed her rabbit?

What should her rabbit drink?

Where would her rabbit sleep?

What else does she need to do to take care of her rabbit?

Can you create your own exercise plan? Think of different exercises you could include. How many times would you like people to do the exercise? Example:

2 star jumps

5 frog jumps

Run on the spot for 3 minutes.

Can you create a poster to identify how humans should keep themselves clean? Remember the things we talked about in school when washing our hands. Describe why it is so important to keep clean.
