

LO: To identify the planets in our Solar system

Planet Order

	M_____	My
	V_____	Very
	E_____	Excited
	M_____	Mother
	J_____	Just
	S_____	Served
	U_____	Us
	N_____	Noodles

Come up with your own mnemonic to remember the order of the planets.

M_____

V_____

E_____

M_____

J_____

S_____

U_____

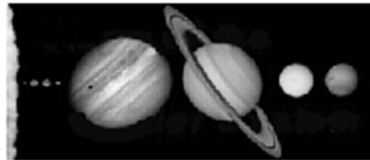

N_____

Pluto is no longer considered a planet and has been officially named as a dwarf planet.

The Planets and Moons of Our Solar System

1. This planet has one more moon than Earth. The planet is called _____. It has _____ moons.
2. This planet has the most moons. The planet is called _____. It has _____ moons.
3. This planet is closest to the Sun. The planet is called _____. It has _____ moons.
4. This planet has the second most moons. The planet is called _____. It has _____ moons.
5. This planet is third from the Sun. The planet is called _____. It has _____ moon.
6. This planet is the farthest planet from the Sun. The planet is called _____. It has _____ moons.
7. This planet has the same number of moons as Mercury has. The planet is called _____. It has _____ moons.
8. This is the closest to Neptune. The planet is called _____. It has _____ moons.

Sun

Mercury

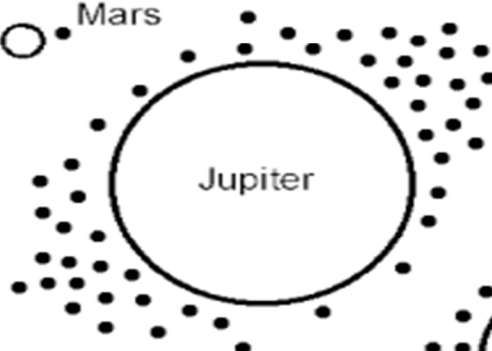

Venus

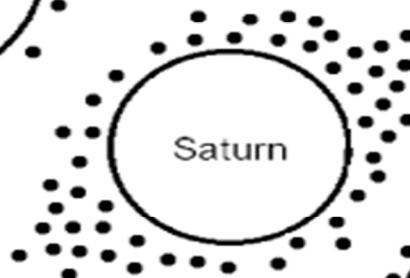

Earth

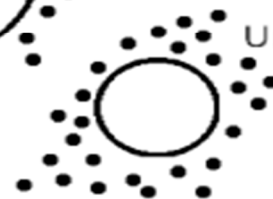

Mars

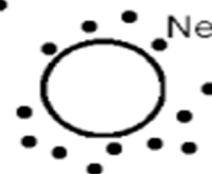

Jupiter

Saturn

Uranus

Neptune

The Planets and Moons of Our Solar System

Our solar system has one Sun and eight planets. Some of the planets have moons and some do not. Some of the planets have many moons and some have only a few.
