All animals need certain things to survive. Can you answer these questions?

1. What three things do all animals, including people, need to stay alive?

water

food

oxygen

2. Why do animals need food?

e.g. So they have energy to move and grow.

3. Describe the difference between a carnivore, a herbivore and an omnivore:

Carnivores:

A carnivore eats meat (other animals).

Herbivores:

A herbivore only eats plants, not meat.

Omnivores:

An omnivore eats both animals (meat) and plants.

4. Name three places animals can get water from:

5. How do animals on land take in oxygen?

e.g. They breathe in oxygen through the air.

6. How do animals underwater take in oxygen?

e.g. They breathe in oxygen in the water through their gills.

7. What other things can you think of that help animals to stay happy and healthy?

e.g. A safe place to live, being a good temperature (not too hot or cold), etc.
