

# Deadly Dinosaurs

<https://www.twinkl.co.uk/go/resource/tgv2-t-18-how-to-draw-a-dinosaur-video-1> Watch and follow this tutorial on how to draw a dinosaur. Once you've finished teach a family member. Don't forget to email a picture of your dinosaur drawings to the school email address.

Choose a dinosaur and create a mini fact file, book or poster with interesting facts that you found out.

*What is its name?*  
*What does the name mean?*  
*Describe what it looks like.*  
*What does it eat?*  
*Where did it live?*  
*How big was it?*  
*How heavy was it?*  
*Did it have any enemies?*  
*Which period of time did it exist in?*

Open the photographs of different dinosaur fossils that have been uploaded. Examine them carefully and make notes on what you can see. Can you identify the body parts? Which dinosaurs do they belong to?

Can you use materials that you have at home to create a model of a dinosaur's feet? Look closely at images and think about what you can use to create the right shape, add colour and detail. See the instructions on how to create 'Velociraptor feet' for inspiration.

Watch this video created by the National History Museum which explains how fossils are formed.  
<https://www.youtube.com/watch?v=87E8bQrX4Wg>  
Can you create a poster with detailed descriptions and diagrams to show how a dinosaur fossil is formed? **Why are dinosaur fossils so rare?**  
You could read page 12 from the 'Dinosaur and Fossils' booklet for more information to add to your poster.

**Choose some tasks to complete or make up your own. Remember you can email any work to our school email address! We look forward to seeing your creativity!**

**Design and make your own dinosaur mask. We would love to see a photo of you wearing it!**

<https://www.bbc.co.uk/cbeebies/makes/presenters-making-a-fossil>  
Click on the link above to watch a tutorial on how to make your own fossils!  
Be creative and find different objects around your home and garden to make a variety of imprints. You could even use a toothpick to create the skeleton of your favourite dinosaur! We can't wait to see pictures of your home made fossils! Keep them safe and when we return to school we can showcase them in our 'Broadfield Museum'.

<https://www.bbc.co.uk/cbeebies/radio/nina-earth-explorers-dinosaurs> Listen to the podcast about Dinosaurs!  
Can you practise saying and writing the names of all the different dinosaurs that are mentioned?  
How are fossils found? What do we call people who study fossils? What information can we get from fossils? Write your answers in your exercise book along with any other new information you've learned from this podcast.

<https://www.bbc.co.uk/teach/class-clips-video/geography-ks1-ks2-fossil-hunting-along-the-jurassic-coast/zbbrkmn> Watch this video which explains how fossils are created and where they can be found on a beach in England. Can you locate Lyme Regis on a map?  
Can you research the different areas where dinosaurs lived around the world? Which continents did they live in? Find these on a map. You can also use Google Earth.
