

Velociraptor Feet

You will need

Cardboard box
Pen or pencil
Scissors
Two colours of paint
A sponge
Glue

Remember to ask a grown-up for help

1

Take an old cardboard box and flatten it out. Place your foot or shoe onto the cardboard and draw a rounded foot shape. You will need two, one for each foot. Cut both shapes out.

2

So they fit over your feet, cut a big smile shape near one side and three toe shapes near the other side. Cutting cardboard is hard so ask your grown up to do this part.

3

Once you have cut everything out, paint the pieces on both sides with one colour, then leave them to dry.

4

To make your velociraptor feet look detailed, sponge on a second layer of paint in a different colour.

5

Cut 3 toenails from leftover cardboard. Paint and then glue them to the feet.

Now you can look the part with your Velociraptor feet!
