

Monday examples: Part 1

Hi Year 5's, hope you are all keeping safe, remember we all miss you and are looking forward to seeing each and every one of you as soon as we possibly can.

This week we will continue with revisiting place value but will look at Roman Numerals. I know this is an area a lot struggle with and the expectation in Year 5 is that you can read and write years in Roman Numerals. I will give examples of work like last week just to guide you with the understanding. The important things to remember with Roman Numerals are the rules.

**If a lower value number comes after a greater value, you add them. XI = X (10) + I (1) = 11**

**If a higher value number comes after a lower value number, then you subtract the lower from the higher. IX = I (1) – X (10) = 9**

**Remember: I = 1    V = 5    X = 10    L = 50    C = 100    D = 500    M = 1000**
