

Monday: To use a formal written method to add whole numbers.

All that is meant by using a formal written method, is to line up your numbers correctly underneath each other, with each digit in the correct column.

For example:

$$\begin{array}{r} 3764 \\ + 2568 \\ \hline 6332 \\ \hline 111 \end{array}$$

$$\begin{array}{r} 58290 \\ + 47843 \\ \hline 106133 \\ \hline 111 \end{array}$$

$$\begin{array}{r} 427385 \\ + 392749 \\ \hline 820134 \\ \hline 11111 \end{array}$$

Copy and complete, set out as in the examples above.

1) $1638 + 854 =$

5) $43\,675 + 15\,859 =$

2) $2475 + 1369 =$

6) $37\,649 + 14\,631 =$

3) $4853 + 2526 =$

7) $58\,595 + 25\,274 =$

4) $3167 + 748 =$

8) $26\,828 + 13\,457 =$

CHALLENGE

Copy and complete, set out as in the examples above.

1) $367\,657 + 145\,897 =$

5) $467\,838 + 349\,372 =$

2) $295\,738 + 245\,984 =$

6) $679\,473 + 265\,989 =$

3) $549\,546 + 372\,855 =$

7) $363\,756 + 346\,476 =$

4) $298\,399 + 145\,786 =$

8) $556\,967 + 24\,976 =$
