

## Homework Menu

**This half term we will be going over everything we have learnt in science and seeing how much we have remembered! We have covered many topics including seasonal changes, identifying habitats, growing plants and growth and survival.**

**Complete these activities and let's see what wonderful**

Look at the poster, which shows the life cycle of a frog. Complete the sheet (or draw your own life cycle). You could choose a different life cycle to draw. Eg a butterfly.

<http://www.crickweb.co.uk/ks1science.html>

Click on the link and complete the 'young animals crossword' game.

See how many you can remember.

If you are struggling, you could always look on google to help you find the answer!

# SCIENCE

Animals need many different things to keep them alive. Have a look at the RSPCA website and use this quiz to test your knowledge. <http://www.rspca-education.org.uk/meeting-their-needs>

Log into purple mash and complete the science 'to-dos'.

Watch the video about how animals adapt to their habitats.

<https://www.bbc.co.uk/bitesize/clips/zyx76sg>

Can you create a poster to show why different animals live in different habitats.

Complete the questions all about plants.

How much can you remember? Remember a plant is a living thing and needs lots of things to keep it alive.

Complete the months of the year worksheet and use this to help you match these to each season. Remember we have 4 seasons in 1 year.
