

Identify Miss Hanley's creatures and find out about one of them... or more..

1. Name them - what type of creature are they?

2. Create a poster or factfile about a creature you have chosen from Miss Hanley's pets.

Prissy (first right) and Percy (second right) are only young. They don't live for very long.

I cant put them together. Why?

What are they?

What is special about them?

What type of animal are they?

Max is very quiet and hides very well. I want a Bumblebee species of this pet.

What is special about it?

What type of animal is it?

Chinchy is a male. He is very fast and bouncy. Very very fluffy and cute

What is he?

What is special about him?

What type of animal is he?

Gerard (above) and Gertrude (left) are only babies, but they are growing fast.

What are they?

What is special about them?

What type of animal are they?

Terry (above left) and Terri (above right) are a couple. They move quite quickly and eat loads of salad every day. They love to paddle in a warm bath because it helps them hydrate and poo.

What are they?

What is special about them?

What type of animal are they?

Hoggy (above left) and Heggy (above right) are a couple. They move across the floor and find it hard to climb. They are very placid.
